

Wall Mount 6 x 6 Mount

Application

A linear 6 x 6 wall-mounted fixture for distinctive architectural lighting plans. Ideal for corridors, lobbies and office areas, 6x6 Series fixtures can be installed individually or in continuous rows.

FEATURES & SPECIFICATIONS

Housing

Die-formed and welded 20-gauge cold rolled steel. Knockouts on ends allow continuous wireway mounting. A 1/2" regressed flange at the bottom insures uniformity and rigidity. Direct - Indirect fixtures have a 3" opening along the length of the fixture to provide an upward component of between 35% - 50% ceiling and wall illumination.

Diffusers (not included)

Fixture accepts various lenses or louvers. Optional welded light-leak hinges are available on ends. 6' and 8' units have a steel mullion to join two individual diffusers.

Mounting

Fixtures can be mounted flush against the wall or hung with wall brackets measuring 4 1/2" square by 1" deep. Two brackets are used on 2, 3, and 4 foot fixtures and 2 or 3 brackets for 6 and 8 foot fixtures as required.

Listing

Fixtures conform to Underwriters' Laboratories standards for production and are carefully tested prior to packing.
