

Indirect/Direct Recessed Retrofit Kit-Dual Diffuser

APPLICATIONS

Now most recessed troffers and parabolics can be converted to more efficient Indirect/Direct dual diffuser recessed fixture with this unique kit. This kit offers a true Indirect/Direct solution that not only provides a more energy efficient solution but also the true comfortable performance of an Indirect/Direct fixture designed especially for workspaces with CRT's. Most other kits simulate the appearance while providing direct light only. This kit provides true reflected light off of the highly reflective white reflector for a true "sky light effect." This unique kit works with T5 lamps in 2 or 4 lamps with either a perforated basket or a highly efficient specially designed acrylic diffuser. With this kit, you will get the energy savings and performance of the latest technology without the fuss and mess of changing out fixtures completely.

Choice of perforated basket (PF) or linear ribbed acrylic diffuser (RL) shown. With linear ribbed diffuser, fixtures are over 80% efficient.
