

Retrofit Doorframe Kit

FEATURES & SPECIFICATIONS

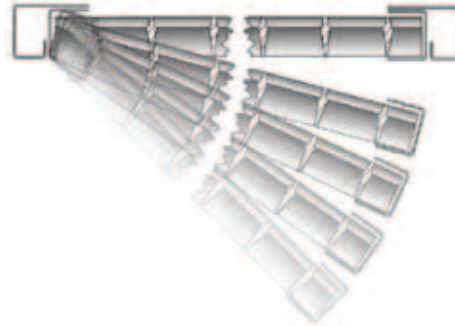

The Retrofit Doorframe Kit exemplifies both simplicity and function. The sturdy steel frame is installed onto a standard inverted tee system, the luminaire returned to its original position but now on top of the frame and the door containing your choice of light control media can then be installed. The door is supported by integral pin hinges and is fastened with cam latches. The majority of louvers and all lenses can easily be adapted to fit the door. The retrofit Doorframe Kit is an easy choice for areas that contain missing, damaged and mismatched luminaire door frames.

SIZE (L x W)
